EDUCATION

Obafemi Awolowo University

Software Engineering — Incoming

JAMB UTME Score: 314

Devesels School, Ijeododo

Senior Secondary Certificate — 2025

PROFILE

Self-taught software engineer building production-ready, full-stack web platforms solo — from SaaS tools to client-facing systems. Comfortable owning a project end to end: architecture, frontend, backend integration, and deployment. Incoming Software Engineering student at Obafemi Awolowo University, with a growing interest in game development.

PROJECTS

SiteNix SOLO

dskyle77.vercel.app/projects/sitenix

A platform enabling Nigerian businesses to launch SEO-optimized mini-sites in minutes, with reusable page sections, live editing, custom branding, and WhatsApp-based lead capture.

Stack: Next.js, TypeScript, Firebase, Tailwind CSS

Benzene Plus Academy SOLO

dskyle77.vercel.app/projects/benzene-plus-academy

Full-stack enrollment platform and content management system for a Lagos-based JAMB/WAEC/NECO tutorial academy, engineered to convert visiting parents into registered students.

Stack: Next.js, TypeScript, Firebase, Tailwind CSS

Legal Baby Distribution FREELANCE

dskyle77.vercel.app/projects/legal-baby-distribution

Paid client project (2026): a music distribution platform for independent artists, featuring a modern frontend and a scalable content structure.

Stack: Next.js, Tailwind CSS, shadcn/ui

WHAT I BRING

- Ships complete products alone — from idea to deployed, working software.
- Real freelance client experience delivering to a brief and a deadline.
- Consistent modern stack across projects: Next.js, TypeScript, Tailwind, Firebase.
- Actively learning outside web development, including Godot for game development.
